

# EXPEDITIONS

Dissemination | Implementation | Translation | Innovation

The Center for Clinical and Translational Science (CCTS) Presents:

## Use of RE-AIM / PRISM

**Tuesday, April 21, 2026**  
**12-1 PM (CT), via Zoom**

Join us for the April CCTS Expeditions Forum, a monthly series exploring how effective interventions, clinical approaches, and policy innovations are translated into practice across clinical, community, and public health settings. This session, “*Use of RE-AIM / PRISM*,” continues the discussion of these widely used implementation science frameworks by highlighting real-world research applications that demonstrate how RE-AIM and PRISM can guide study design, evaluation, and implementation.

Featured presentations include:

- **Courtney E. Gamston, ScM, PharmD, BCPS**, (Auburn University) | “*From Design to Delivery: Evaluating a Transitions of Care Service Using RE-AIM*”
- **Amanda Staiano, PhD**, (Pennington Biomedical Research Center) | “*TEAM UP: A randomized, pragmatic, comparative effectiveness trial of child obesity treatment in primary care*”
