

# EXPEDITIONS

Dissemination | Implementation | Translation | Innovation

The Center for Clinical and Translational Science (CCTS) Presents:

## Global health reciprocal innovation: Examples and strategies for bi-directional insight, implementation, and impact

---

**Tuesday, June 16, 2026  
12-1 PM (CT), via Zoom**

Join us for CCTS Expeditions Forum, a monthly series highlighting how dissemination and implementation science is applied across clinical, community, and public health settings.

**Katia Bruxvoort, PhD, MPH**, associate professor of epidemiology in the UAB School of Public Health, will discuss reciprocal innovation in global health, highlighting examples and strategies for bi-directional learning, implementation, and impact. Attendees will explore how insights developed across global settings can inform implementation approaches, strengthen partnerships, and support practical solutions across clinical, community, and public health contexts.
