

Update to Improve Biohazardous Waste Removal

Due to the number of laboratories that are having trouble with their medical (biohazardous) waste removal because no one is available to sign, we now have the option of a pre-signed manifest. Follow the [instructions](#) to fill out the [pre-signed manifest](#) online, send a copy to OHS at medwaste@uab.edu , and print a copy to leave with your [properly packaged medical \(biohazardous\) waste](#). The pre-signed manifest authorizes Stericycle to remove your medical (biohazardous) waste without the presence of [trained personnel](#), as long as instructions are followed and regulations for the packing of medical (biohazardous) waste are met.

If you have questions, please contact OHS 934-2487.
