

# FIND OUT IF YOUR CHILD IS AT RISK FOR TYPE 2 DIABETES

The DISCOVERY Study is a new, national effort to learn about the causes of type 2 diabetes in children. For more information, please visit our website or contact your local study center.

## WHAT DO PARTICIPANTS GET?

- Test results about diabetes risk will be shared with participants and their medical providers
- Payment for each study visit
- Gifts and prizes

## WHO MAY BE ELIGIBLE?

Children between 8 and 15 years old with:

- High Body Mass Index (BMI)
- Family history of diabetes
- Previous diagnosis of pre-diabetes

## WHAT HAPPENS IF I PARTICIPATE?

The DISCOVERY study involves close monitoring to detect the earlier signs of type 2 diabetes using state of the art testing:

- In-clinic visits (2x a year)
- Blood tests
- Wearable devices
- Questionnaires for children and their caregivers

## HOW DO I GET MORE INFORMATION?
