# Trauma Defined

“The experience of an event by a child that is emotionally painful or distressful, which often results in lasting mental and physical effects.”

-National Institute of Mental Health

Reminder! This word carries a lot of weight for people who have experienced these things. Let's be careful not to minimize someone's experience.

# History of Trauma Informed Care (TIC)

- Originated in medicine in the 1970's post Vietnam War
- Helping professionals outside of medicine began to see the need to create a treatment program of TIC
- Treatment program born out of the need for helping professionals to understand how childhood trauma can affect adult behavior
- Eventually this led to the first study done by the Center for Disease Control & Prevention done in 1998

1970's	Late 90's	1998	2007+
<b>Originates in Medical Field</b>  People coming home from the Vietnam War presented with symptoms that could not be treated appropriately without attention to their mental health	<b>Social Workers make treatment program</b>  Helping professionals outside of medicine began to see the need to create a treatment program of TIC to better understand how childhood trauma can affect adult behavior	<b>ACEs Study Part 1</b>  First study around ACEs completed by the Center for Disease Control & Prevention	<b>Case Management</b>  As Case Management has become an entity within Higher Education this becomes a real framework of how we will incorporate TIC into our work

People with 6+ ACEs can die

**20 yrs**

earlier than those who have none

1/8 of the population have more than 4 ACEs

[www.70-30.org.uk](http://www.70-30.org.uk)  
@7030Campaign

Slide Source: 70/30 Campaign with Harvard Primary Health

## 4 or more ACEs

3x

the levels of lung disease and adult smoking

14x

the number of suicide attempts

4.5x

more likely to develop depression

11x

the level of intravenous drug abuse

4x

as likely to have begun intercourse by age 15

2x

the level of liver disease

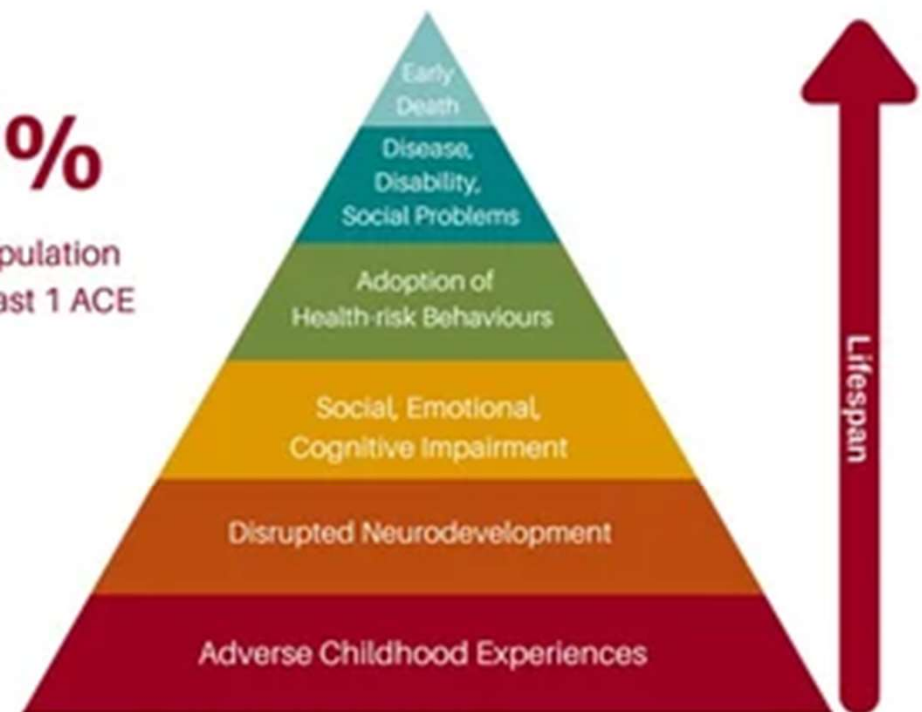

“ Adverse childhood experiences are the single greatest unaddressed public health threat facing our nation today ”

Dr. Robert Block, the former President of the American Academy of Pediatrics

**67%**

of the population have at least 1 ACE

# Lasting Impacts

## The impacts of childhood trauma into adulthood

According to Felitti et al. (1998), as the number of traumatic childhood events increases, so does the risk for serious health problems in adulthood. In addition, adults who experienced trauma as children are:

- 15 times more likely to attempt suicide
- 4 times more likely to become an alcoholic
- 4 times more likely to develop a sexually transmitted disease
- 4 times more likely to inject drugs

- 3 times more likely to use antidepressant medication
- 3 times more likely to be absent from work
- 3 times more likely to experience depression
- 3 times more likely to have serious job problems
- 2.5 times more likely to smoke
- 2 times more likely to develop chronic obstructive pulmonary disease
- 2 times more likely to have a serious financial problem

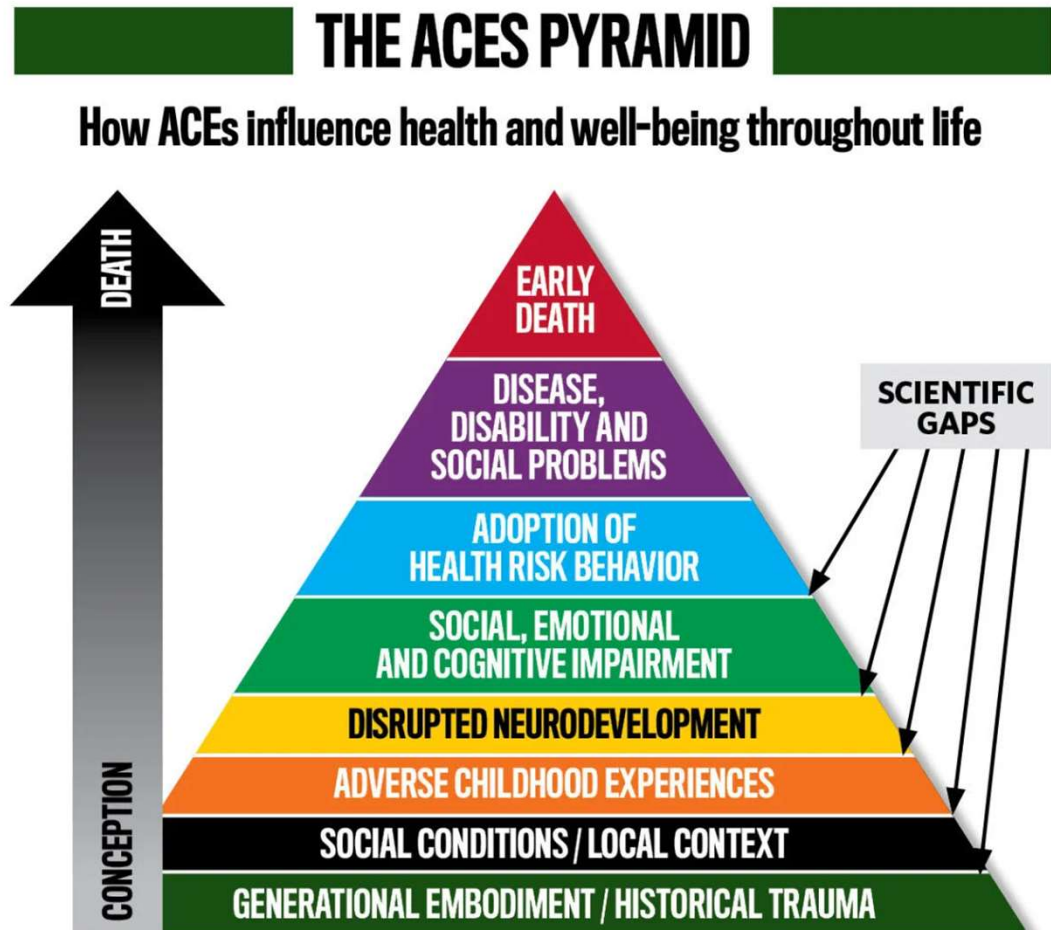

University  
of Dayton

# Relationship Between TIC + Case Management

- Preliminary data suggests there was on average 20 million enrolled college students in the United States during Spring 2022
  - Education Data Initiative Organization (2023)
- 67% of the US population has at least 1 ACE
  - Harvard Health

THE  
CAMPAIGN  
FOR THE  
UNIVERSITY  
OF DAYTON

# Relationship Between TIC + Case Management

The “Population Attributable Risk” of ACEs is very high, indicating that many health challenges are directly impacted by ACEs. For example, 78% of IV drug use can be attributed to higher levels of ACEs as well as 67% of risk factors for alcoholism, 65% of the risk for suicide and so on. The chart at left indicates risk levels attributable to ACEs. By addressing ACEs we reduce the overall risk for each of these issues improving overall health outcomes in many areas of health.

# Issues/Barriers

- Negative Connotations of “Case Management”
- Inaccurate perceptions held by campus partners
- Trainings & outreach focused on high-risk behaviors
- Uninviting and overly administrative space
- Inconsistent or missing protocols and procedures

University  
of Dayton

# Trauma-Informed Practices

1. Build awareness and generate buy-in
2. Invest in a trauma-informed workforce (e.g., training)
- 3. Create an environment that is safe and welcoming**
- 4. Engage students in meaningful ways**
  - a. Ask students how they feel, and listen
  - b. “What has happened to you” (not, “What’s wrong with you”)
  - c. Involve them in their action planning
5. Identify and address trauma (appropriate resource referral)

(Center for Health Care Strategies, 2019)

# Student Care & Advocacy

## Mission

To promote individual and systemic student success and wellbeing. Informed by the Marianist spirit of care, we support, empower, and advocate for students facing challenges, stressors, and barriers in their academic and personal pursuits.

## Vision

A UD community of care engaged in promoting student wellbeing through the use of support resources in their pursuit of academic and personal success and holistic wellbeing.

## Who is Student Care & Advocacy?

We are a team within the Dean of Students Office who work individually with students facing challenges, life stressors, or barriers that impact their academic and personal success, or wellbeing. Informed by the Marianist spirit of care, we support, empower, and advocate for students on their journey back to the path of success and wellness.

Student Care & Advocacy  
Gosiger Hall, Room 205  
937-229-1212 (main)*

## How can they help?

Our team can help students in a number of ways:

- Talk with you about your unique situation
- Identify skills to promote your success and wellbeing
- Connection with a UD campus resource
- Connection with a Dayton community resource
- Coordinating support across campus
- Major Life Event notice to your instructors
- Assistance with University processes and procedures

## What can I expect at the first meeting?

During your first meeting, you will talk with one of our case managers. We will get to know you, your UD experience, and what situation or challenges you are facing that brought you to our office. Based on our conversation and your unique situation, we will work with you to identify campus and/or community resources that may be able support you and provide assistance as you move forward.

## A PRACTICAL GUIDE FOR COMMUNITY

At the University of Dayton, our strong sense of community means students should not struggle alone. At times, undergraduate and graduate students may feel alone, isolated and even hopeless when facing life's challenges.

### YOU HAVE AN IMPORTANT ROLE.

As a faculty or staff member, you are in a unique position to identify students who may require additional support. In some cases, it may go beyond offering a listening ear; your role may require that you report certain behaviors.

Use this folder to identify opportunities to support students, connect students to resources and learn the signs that tell you when to seek help on a student's behalf.

## Dean of Students Office: Student Care & Advocacy

### Who is Student Care & Advocacy?

Our team works to support and assist students as part of the larger academic mission. Students who are struggling with any type of personal issue often experience complications in the classroom and cause concern for UD faculty and staff. Our team assists these students on their journey toward success and holistic wellbeing.

### How does Student Care & Advocacy help students?

We work individually with students to develop the necessary skills to manage their academic and personal responsibilities while experiencing challenging and overwhelming situations and life stressors. Our team of case managers help students connect with supportive resources available on campus and in the Dayton community and navigate various campus processes and procedures.

### How do I share my concern for a student?

Visit [go.udayton.edu/reportaconcern](https://go.udayton.edu/reportaconcern) to share your concerns with the Student Care & Advocacy team. Our team will reach out to the student and offer a meeting to discuss resources and support. Help us by encouraging the student to accept our invitation to meet. After reaching out the student, we will close the loop with you via email.

### SIGNS OF CONCERN

- Loss of Motivation
- Changes in Hygiene
- Suicidal Thoughts
- Delusions/Hallucinations
- Self-Inflicted Injuries
- Changes in Eating Habits
- Profound Grief
- Substance Abuse
- Food Insecurity
- Housing Instability
- Disruptive Outbursts
- Unyielding Arguments
- Violent Acts/Threats
- Missing Student

# Assessing the Efforts

- Utilized the Organizational Reflection Toolkit from the National Center on Domestic Violence, Trauma & Mental Health
  - Checklist to verify your trauma informed organization
    - Series of 9 questions to assess your space/department

University  
of Dayton

# Self-Assessment Questions

1. Consideration given to physical and sensory environment
2. Staff members have been trained in TIC
3. Attentive to impact the environment can have on both students and staff
4. Staff members make changes when there is an opportunity that something may be retraumatizing to someone
5. Staff work with students to develop strategies to approach moments of retraumatization
6. Rules are non-punitive and student rights are valued
7. Physical space is quiet, soothing, and accessible
8. Staff are trained on crisis prevention and intervention
9. Staff have materials available on trauma that are educational without being graphically explicit

University  
of Dayton
